

NothingPretty.org

Are these your new best friends?

Crystal Meth is addictive. You could lose your family, friends, lovers... even your job. In your drug-induced head, the only friends you'll want will fit right into your hands. Not quite the support you'll need when you're suffering from heart, lung or brain damage caused by Tina. Some friend. For more information about the effects and dangers of Crystal Meth, visit nothingpretty.org or call the treatment hotline at 888 736 0253.
